

## Situation-

Our client, Nishawho was a 40 year old mother, with the custody of her only child, Aditya who was 10 years old. Nisha worked in a multinational company and was the sole bread-earner of the family. She also had her elderly mother to look after but with her well-paying corporate job, that was never really a concern.

## Solution

Nisha used to go cycling every Sunday and one fateful Sunday afternoon, her bike was hit by a car while she was going through an intersection. Nisha had diabetes and the accident resulted in a lot of blood loss. She was immediately hospitalized but she succumbed to her brain injury in 10 days. The entire family broke down but Nisha's younger sister who had flown down from U.K., took over the situation. Nisha had told her about the Life insurance policy that she had taken from us and we got a call from her sister around a month after her demise. We guided her through the entire process and made it as smooth as possible. They got their entire claim of Rs. 50 lakhs (the total sum assured) in the end.
